LGT-2200L

Compression Therapy Device

Health Life Longest Care

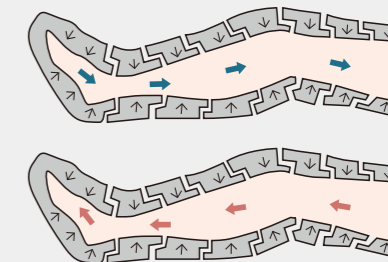

Longest

LGT-2200L is sequential pneumatic pressure system that through program controlled inflation and deflation of the sleeves covered in arms, legs, waist, and back to realize therapeutic effect

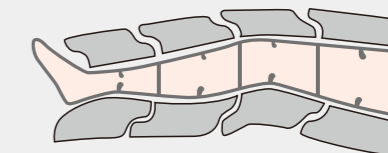

⊕ Mechanism and functions

The inflation and deflation of the sleeves enhances the backflow of venous blood and lymph, which can improve the blood circulation of diseased areas. This will lead a series of beneficial effect such as improving the function of peripheral blood vessels, removing the edema, accelerating the healing process, and preventing Muscular Dystrophy.

Features

- ⊕ Overlapping air chambers generate a gliding pressure wave with high efficiency
- ⊕ User-friendly interface, just a few steps to finish your setting
- ⊕ Gentle inflation and deflation
- ⊕ Real-time pressure, time, and inflation part monitoring (visible in the interface)
- ⊕ Durable & easy-use sleeves
- ⊕ Pressure unit switchable between mmHg and kPa

Overlapping Air Chamber

Four chambers modes

⊕ Specifications

Channel	2
Sleeve chambers	1 / 2 / 4 / 8
Compression modes	18 (Including 3 DVT modes + 6 four chambers modes+ 9 eight chambers modes)
Time range	1 - 99 mins
Pressure range	37 - 187 mmHg
Interface	5.7" touch screen
Dimension	393 (L) x 366 (W) x 194 (H) mm
Weight	10kg

⊕ Application

- ⊕ Prophylaxis of Deep vein thrombosis (DVT) (Post-stroke deep vein thrombosis, Post-traumatic deep vein thrombosis)
- ⊕ Prophylaxis and treatment of edema (Chronic venous edema, Lymphedema, Post-mastectomy lymphedema)
